BELOW IS THE MAIN PRODUCTS WE CAN OFFER:

Facing paper: including high imitation marble styles, wood grain styles, solid color styles, and ungrouped styles, the surface can be coated with paint of Amino and PU etc. The GSM range is from 30 to 50 grams.

Heat sublimation paper for glass: Heat sublimation transfer paper is mainly used in glass back surface, suitable for glass products, such as tea table and other transparent items that need to be decorated on back surface.

Heat transfer film: Using PVC and PET as base material, the heat transfer film can be transferred to MDF boards, metal products and polymer plate by heat transfer printing equipment. For PVC transfer film, it's better used in rugged surface like wasteline skirting line etc, and for PET film, it's better used in smooth surface transferring and has good performance of high temperature resistance.

Wood plastic floor film: PVC floor film is specifically made for wood plastic floor, as it's healthy, eco-friendly and easy operation with vivid design pattern. This has changed the limitations of single color and single design of wood plastic field. It can help wood plastic floor to be more colorful and various.

Because our sales have been gaining bits of experience from clients and market, and feedback timely to our R&D team. This helps us a lot in designing and making more suitable new products. In return for clients, Our products are of good quality, design variety, suitable for the market, and easy operation so they are very popular in markets. Welcome to contact us for more information!

BELOW IS THE MAIN PRODUCTS WE CAN OFFER:

Facing paper: including high imitation marble styles, wood grain styles, solid color styles, and ungrouped styles, the surface can be coated with paint of Amino and PU etc. The GSM range is from 30 to 50 grams.

Heat sublimation paper for glass: Heat sublimation transfer paper is mainly used in glass back surface, suitable for glass products, such as tea table and other transparent items that need to be decorated on back surface.

Heat transfer film: Using PVC and PET as base material, the heat transfer film can be transferred to MDF boards, metal products and polymer plate by heat transfer printing equipment. For PVC transfer film, it's better used in rugged surface like wasteline skirting line etc, and for PET film, it's better used in smooth surface transferring and has good performance of high temperature resistance.

Wood plastic floor film: PVC floor film is specifically made for wood plastic floor, as it's healthy, eco-friendly and easy operation with vivid design pattern. This has changed the limitations of single color and single design of wood plastic field. It can help wood plastic floor to be more colorful and various.

Because our sales have been gaining bits of experience from clients and market, and feedback timely to our R&D team. This helps us a lot in designing and making more suitable new products. In return for clients, Our products are of good quality, design variety, suitable for the market, and easy operation so they are very popular in markets. Welcome to contact us for more information!
